# Noggin for Crisis

Crisis Solution Module

Meet the next generation tool for corporate crisis and business continuity management teams to collaborate, plan, track their response and share information. Noggin Crisis gives response teams and decision makers the tools they need to know what's happening, collaborate quickly and effectively, make better decisions, and enact the right plans to take action when it counts the most.

Use Noggin Crisis to:

- Report and manage all crises, incidents, and issues in a single flexible platform.

- Activate crisis and incident management teams.

- Manage incident response tasks, log and share updates, decisions, facts, and assumptions, and produce situation reports.

- Easily collaborate with your team via chat rooms for each event

- Manage crisis team, business continuity, and other contacts

- Easily create crisis strategies and action plans from our best-practice library, and tailor them to your organisation.

- When events occur, your plan comes to life, your team knows what to do, and progress is tracked in real time.

- Conduct exercises, post-incident reviews, and rapture lessons learned.

- Ensure all your important documents, releases, and other critical files are always at your fingertips

- Communicate about events via email, SMS, or app notifications

- Automate and lead people through your procedures, with fully-configurable workflows.

Key Features:

Noggin Crisis adds the following capabilities to the Noggin Core platform:

- Incident reporting and management for high impact events

- Situational awareness dashboards

- Workspace dashboards for crisis managers, team members, and executives

- Situation reports

- Exercises

- A library of over 70 best practice plans and checklists for managing different events

- After-action reviews
